

p&vlight

L'interpretazione del cristallo The interpretation of crystal

TRE DECENNI DI CREATIVITÀ SEMPRE ACCESA

**L'energia di un progetto che continua,
illuminando di stile e intuizione italiani
gli spazi del Mondo.**

Nella storia di un'azienda, l'evoluzione di
un'idea luminosa.

Al centro, due elementi vivi e vibranti,
profondamente connessi:
luce e cristallo.

P&V Light, da trent'anni, sviluppa una
personale e inconfondibile interpretazione
dell'illuminazione d'interni. Dallo sfavillio
sfarzoso dei puri cristalli Swarovski
all'incontro fecondo con i più nobili
materiali di natura; dalle forme ricche
e decorative a linee rigorose, semplici
e minimali; dai piccoli spazi ai grandi
ambienti di rappresentanza.

Attingendo comunque a una insostituibile
tradizione manuale, senza l'ansia di
crescere a ogni costo, ma perfezionando
continuamente la padronanza di una
piccola nicchia di mercato, ma con grandi
possibilità creative. Scegliendo materiali
di prim'ordine, rispettando l'ambiente e
l'ingegno, seguendo il consiglio di ottimi
designer e valorizzando il saper fare di
botteghe preziose..

THREE DECADES OF CREATIVITY AT ITS BRIGHTEST

**The energy of a project that continues,
illuminating the spaces of the World with
Italian style and intuition.**

P&V Light, for over thirty years, has
developed a personal and unmistakable
interpretation of interior lighting.

From the magnificent sparkle of pure
Swarovski crystals to the fertile encounter
with the noblest materials of nature: from
rich and decorative forms to austere,
simple, minimal lines; from small rooms to
large formal spaces.

Drawing from an exceptional handcrafting
tradition, unheeding of the urge to grow
for the sake of growth, but constantly
perfecting the mastery of a market niche
that may be small, but has great creative
potential.

Selecting the finest of materials,
respecting the environment and pursuing
ingenuity, following the advice of
excellent designers and cultivating the
expertise of respected ateliers.

Facciamo a mano le forme della luce

**Scolpiamo, intagliamo, modelliamo e
componiamo splendore: viene alla luce
il più sapiente artigianato d'Italia.**

Non sappiamo manipolare la luce, ma
siamo in grado di maneggiare e lavorare
con maestria tutto ciò che la contiene e la
irradia.

E della luce non condividiamo solo la
velocità: amiamo prenderci tutto il tempo
necessario per creare oggetti belli, solidi,
completi, rifiniti, attingendo alla fonte di
una sapienza manuale antica e celebre
nel mondo.

Essenziali o ricche e decorative, le nostre
lampade sono fatte con le mani e con
l'anima: oltre che luce, sprigionano calore.

WE SHAPE LIGHT BY HAND

**We sculpt, we carve, we shape and we
compose splendour: we bring the finest
Italian craftsmanship to light.**

We don't know how to manipulate light,
but we can handle and expertly process
everything that contains and diffuses it.
And we share more with light than just
speed: we like to take the time we need
to create beautiful, solid, complete,
well-detailed objects, drawing from the
wellspring of ancient world-renowned
crafting skills. Essential or rich and
decorative, our lamps are made with the
hand and with the soul: they radiate both
light, and warmth.

Facciamo attenzione a non spegnere l'ambiente

L'energia più pura e luminosa è tutta intorno a noi: non stacciamo mai la corrente alla Natura.

Per illuminare gli ambienti in cui viviamo serve il sostegno dell'energia. Per sopravvivere, l'ambiente ha bisogno di scelte sostenibili. Le lampade P&V sono concepite e realizzate in modo che sia facile smaltire i componenti e i materiali artificiali, quelli che trasmettono loro l'elettricità. Separare le singole parti, una volta esaurito il loro ciclo di vita, è agevole e intuitivo, perché possano essere eliminate o riciclate senza compromettere gli equilibri dell'ecosistema.

LET'S BE CAREFUL NOT TO TURN OFF THE ENVIRONMENT

The purest and brightest energy is all around us: let us avoid switching off the power of Nature.

To light the spaces we live in we need the help of energy. To survive, the environment requires sustainable choices. P&V's lamps are conceived and made to facilitate disposal of the artificial components and materials, the ones that convey electricity. Once their life cycle is over, the separation of the individual parts is easy and intuitive, so that they may be disposed of or recycled without jeopardizing the balance of our ecosystem.

Illuminare le stanze con i colori del bosco

Dallo spazio aperto alle nostre stanze, senza passaggi artificiali.

Luce viva e vibrante, per natura.

Ciò che vive di luce in natura, naturalmente impreziosisce e arricchisce ambienti concepiti per farti star bene. È la ragione per la quale utilizziamo solo legno integro - ricavato da foreste controllate e periodicamente rimboschite - non verniciato o lavorato con tinte ad acqua, così da custodirne intatta l'essenza vibrante, che può ancora diffondere il suo profumo unico. Ci trasmetterà così i raggi di luce e calore che ha pazientemente assorbito dal sole, quand'era tronco.

LIGHTING THE ROOMS WITH THE COLOURS OF THE FOREST

From the outdoors to our spaces, with no artificial transitions. Vital and vibrant light, naturally.

What lives in the light of nature, naturally brings richness and refinement to the spaces conceived to make you feel good. That is why we only use solid wood - harvested from certified and periodically reforested woodlands - neither painted nor tinted with water-based stains, so that its vibrant essence remains intact, and it may continue to release its unique fragrance. And thus it can diffuse the rays of light and warmth that it patiently absorbed from the sun, when it was still a tree-trunk.

Luce fatta di Forza e di Natura

Ci piace incorniciare così la luce dei nostri ambienti: nella forza dolce della Natura, con l'opera laboriosa e attenta di un lavoro sapiente.

Marmo, pietra, legno, ceramica.

Il cristallo lo accostiamo ai pregiati e vigorosi materiali che ci offre la nostra Terra, variegata e generosa.

Li selezioniamo tra i più puri e resistenti. Li scegliamo sempre vicino a noi, dove il territorio custodisce e temprava tesori e non ama essere sporcato dai gas e dai fumi che ne segnano le vie. Lasciamo che li modellino con perizia botteghe e imprese eccezionali: ne siamo circondati e ci rivolgiamo alle migliori.

LIGHT AS FORCE AND NATURE

That is how we like to conceive the light in our spaces: as a gentle force of nature, with the diligent and industrious labour of a job well done.

Marble, stone, wood, ceramic.

We match our crystal to the finest and most vigorous materials offered to us by our Earth, so varied and so generous. We select the purest and most durable. We choose them close by, where our land preserves and forges treasures and shields away from pollution by the gases and fumes that condense around its roads.

We allow them to be expertly shaped by exceptional ateliers and manufacturers: we are surrounded by them and choose to work with the best.

Design che mette in luce la materia

Amiamo tracciare linee decorative e funzionali, per illuminare la personalità degli spazi in cui viviamo e il carattere dell'oggetto.

Morbide o rigorose, complesse o lineari, delicate o vigorose: le lampade P&V assecondano e illuminano in ogni caso le caratteristiche della materia che le definisce, insieme allo spazio che le ospita. Per questo affidiamo la concezione degli oggetti a progettisti di talento, che sappiano interpretare e ravvivare l'essenza delle cose. Per noi è naturale: cresciamo tra le testimonianze di una lunga tradizione di architettura e design razionali, attenti all'uomo e all'ambiente.

DESIGN THAT SHEDS LIGHT ON MATERIAL

We like to draw decorative and functional lines, to illuminate the personality of the spaces we live in and the character of the object.

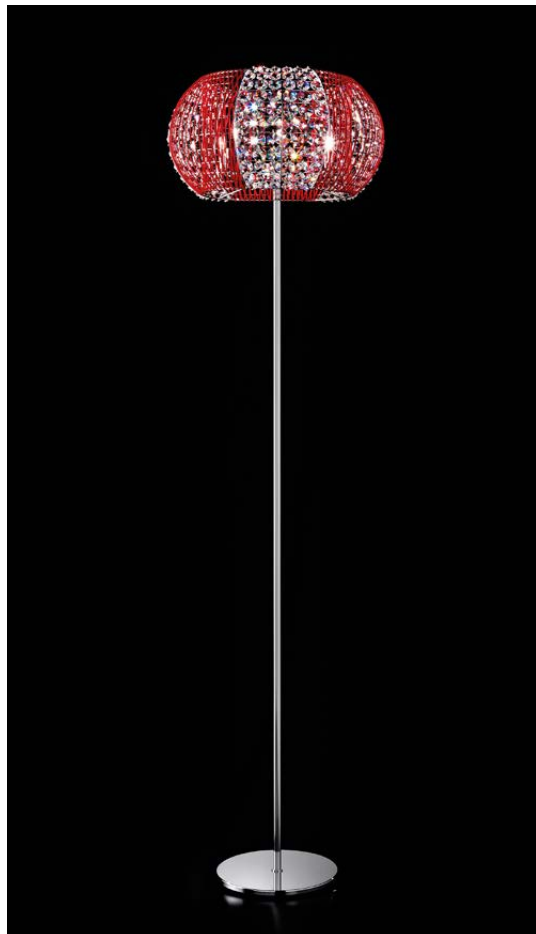

Soft or rigorous, complex or linear, delicate or vigorous: the lamps by P&V support and illuminate the characteristics of the material that defines them, and the space that contains them. This is why we entrust the ideation of the objects to talented designers, who are able to interpret and to invigorate the essence of things. It comes naturally to us: we have grown up surrounded by the legacy of a historic tradition of rational architecture and design, focused on man and his environment.
