✓ DIFFERENCES BETWEEN OLD vs NEW

- Different recessing body: *the new body allows you to pass the power supply through the recessing hole.*

- Unified trim and no trim version: *the new version comes with a frame incorporated in the product as a separate item, to make a trim installation in case you desire it, just by coupling the frame in the recessing body.*

✓ DIFFERENCES BETWEEN OLD vs NEW

- New version provides a more closed beam angle: *from 21° in the old version to 14° in the new version.*

- New pulling out system: *improved system that allows you a better calibration of the spot.*

- Included professional accessories: *Honeycomb and crosshead shielded included with the product with easy installation system.*

- **Protecting ring:** *this ring protect the inner part of the main body of the waste produced in the installation. After the installation it can be removed easily.*
